

Mukwonago Area School District

Building Better Schools Together

ANNUAL ASBESTOS NOTIFICATION

To Whom It May Concern:

As a result of the Asbestos Hazard Emergency Response Act (AHERA), every school was required to complete a comprehensive asbestos inspection and develop a management plan for all asbestos-containing building materials (ACBM), present within the School District. In an effort to comply with this regulation, the School District had all buildings initially inspected by an Environmental Protection Agency (EPA), accredited inspector and any samples taken analyzed by an independent laboratory. This information was then utilized to develop a comprehensive asbestos management plan.

A comprehensive reinspection by an accredited inspector of all ACBM is required every three (3) years, while the periodic six-month surveillance is an additional requirement. The School District contracted with Environmental Management Consulting, Inc. (EMC), to perform the latest three-year inspection. This report is available for your review during normal business hours in the School Office. Copies of this report are also available to you for the cost of copying.

All ACBM found within the School District has been identified, with location and condition assessed. Any areas noted as being in moderate to poor condition will be repaired or removed by the School District. A long-range plan for the management of all ACBM has been developed.

Any questions relating to the ACBM present or regarding the School District's on-going operations and maintenance program should be directed to the Buildings & Grounds Office.
